

Circular Economy and Sustainable Solutions for Agrifood in the Mediterranean

CESAM brings together 9 partners and 1 associate partner from the European Regions of Occitania, Catalonia and Balearic Islands.

Among these 9 partners, 4 are institutional partners from the Regional Innovation Ecosystems (Regional Innovation Agencies, Clusters and Specialised Public administration) and the other 5 are SMEs with specific needs in investment to scale-up their innovative solutions.

**Co-funded by
the European Union**

The Project

The CESAM project is funded under the European i3 (Interregional Innovation Investment) program and supported by the European Regional Development Fund (FEDER). It aims to accelerate the transition towards a circular economy in the Mediterranean agrifood sector by driving innovation and investment in sustainable technologies.

CESAM's primary objective is to promote the development and scaling of innovative solutions that enhance resource efficiency and environmental sustainability across key value chains, particularly focusing on:

Circular solutions for a greener tomorrow.
